December 22, 1965.

Mr. Reginald V. Harris, Q.C.,
Freemasons' Hall,
Halifax, Canada.

Dear Mr. Harris:

My apologies for not having replied sooner to your letter of November 12th. I have been out of town on business and have just recently received your letter.

To date, the analyses have not been completed but I expect to have some results shortly. The carbon dating is being done by a nuclear instrumentation firm in Chicago as a public service for us. Since this firm does carbon dating on a paid service basis, samples submitted by paying customers must necessarily be processed first. This is the reason for the delay in the carbon dating analysis.

The analysis of the hair sample is being done as a special favor by one of the foremost experts on human hair in the area. However, since his present position requires constant traveling it took us some time to contact him. We expect to receive his results shortly.

When I receive the results of the analyses I will promptly forward them to you.

A Joyous Christmas and Happy New Year to you and your associates.

Respectfully,

(Sgd.) William A. Roventine.
